PRESS RELEASE

KATSINA COMES ALIVE ON STARCOMMS NETWORK

Telecom subscribers in the ancient Emirate of Katsina can now end their search for the best of voice and data experience as Starcomms Plc. Nigeria's leading CDMA network hooks the city to its expanding network.

Starcomms, the triple play network has been delighting Nigerians in other parts of the country with effective voice and data services. The services comprise of the fixed wireless and the roaming line services. These come with value added services like call waiting and missed call notification.

The call waiting services enables the subscribers to carry out two conversations interchangeably and at the same time sustaining both calls. The missed call notification informs the subscribers of all the calls they missed when they switch off or move out of service range.

Also, Starcomms customers in Katsina can avail themselves of several other Starcomms products and services, like the 1x CDMA Internet access, especially the highly affordable Starcomms Neo which will give them the benefit of surfing the web at a cost effective rate. This also comes with free internet access of one hundred hours for the first month of installation.

Katsina, the capital city of the state that bears the same name and its surrounding villages will enjoy all other Starcomms offerings for both business and pleasure. One of the entry point benefits that Katsina enjoys is the Starcomms Smart Centre. This innovative small scale business concept is designed to empower Katsina subscribers of Starcomms through the pay phone business.

It is a venture that provides more profit and more opportunity for operators to enjoy the latest technology being delivered by Starcomms for better telephony in the country. With two models in place: *Smart Centre* for the youth, and *business people*, the ultimate aim is the economic prosperity of the operator in terms of profit.

"It is our practice in Starcomms to ensure that telecommunications services led by Starcomms change livelihoods, capacity building and enables economic growth for all Nigerians. That is why we have continued to access the best of technologies for use in our industry to satisfy our customers. Our Katsina subscribers are being served accordingly." Maher Qubain, Starcomms CEO said.
